PROJECTS

Trackie – Bus Tracking System

- Developed a real-time bus tracking system using Vanilla JavaScript, leaflet.js and PHP.
- Enabled passengers to track bus locations, search by route, and view nearby buses.
- Enabled drivers to update their current location for real-time tracking.
- Implemented interactive maps and location-based features for enhanced usability.

<https://trackie.is-great.net>

Planty – MERN Stack E-commerce Site

- Developed a plant e-commerce platform using MongoDB, Express, React, Node.js, and TailwindCSS.
- Enabled buyers to browse plants, view details, search, add to cart, and checkout via eSewa.
- Enabled sellers to add/remove plants, manage stock, and update order/package status.
- Implemented full CRUD operations and responsive design for smooth user experience.
